

NORTH TYNESIDE SCHOOLS

Four highly versatile schools providing first rate facilities for students and the wider community

North Tyneside Schools is a key PFI project focused on improving four schools (Burnside High School, Western Community Primary School, Marine Park First School and Coquet Park First School) in the Wallsend and Whitley bay areas.

Through extensive consultation with the council, local government and key stakeholders, the consortium, led by Kajima, has created unique and all-inclusive educational spaces. All four schools share the same design philosophy but are distinct, with facilities and design features that match the specific site and briefing requirements.

The schools were built with an emphasis on maximising available internal space and providing high quality external environments for students and the wider community to use. The collaborative approach has aided in the development of multi-purpose facilities such as the community pool located at Burnside, which while located on site and used by the school, is owned by the council.

The result is state-of-the-art schools that offer a range of excellent learning facilities and communal spaces to students and the wider community.

CLIENT
North Tyneside Council

SPONSOR & DEVELOPER
